

# DBL: an information system to manage survey-based studies

Francesco Galbiati

Slides here

July 26th 2024

NECST Research Line Fair Event

# About me

Francesco Galbiati

## Degree Program

Master's degree in Computer Science and Engineering  
1<sup>st</sup> year

## Research Topics

Databases

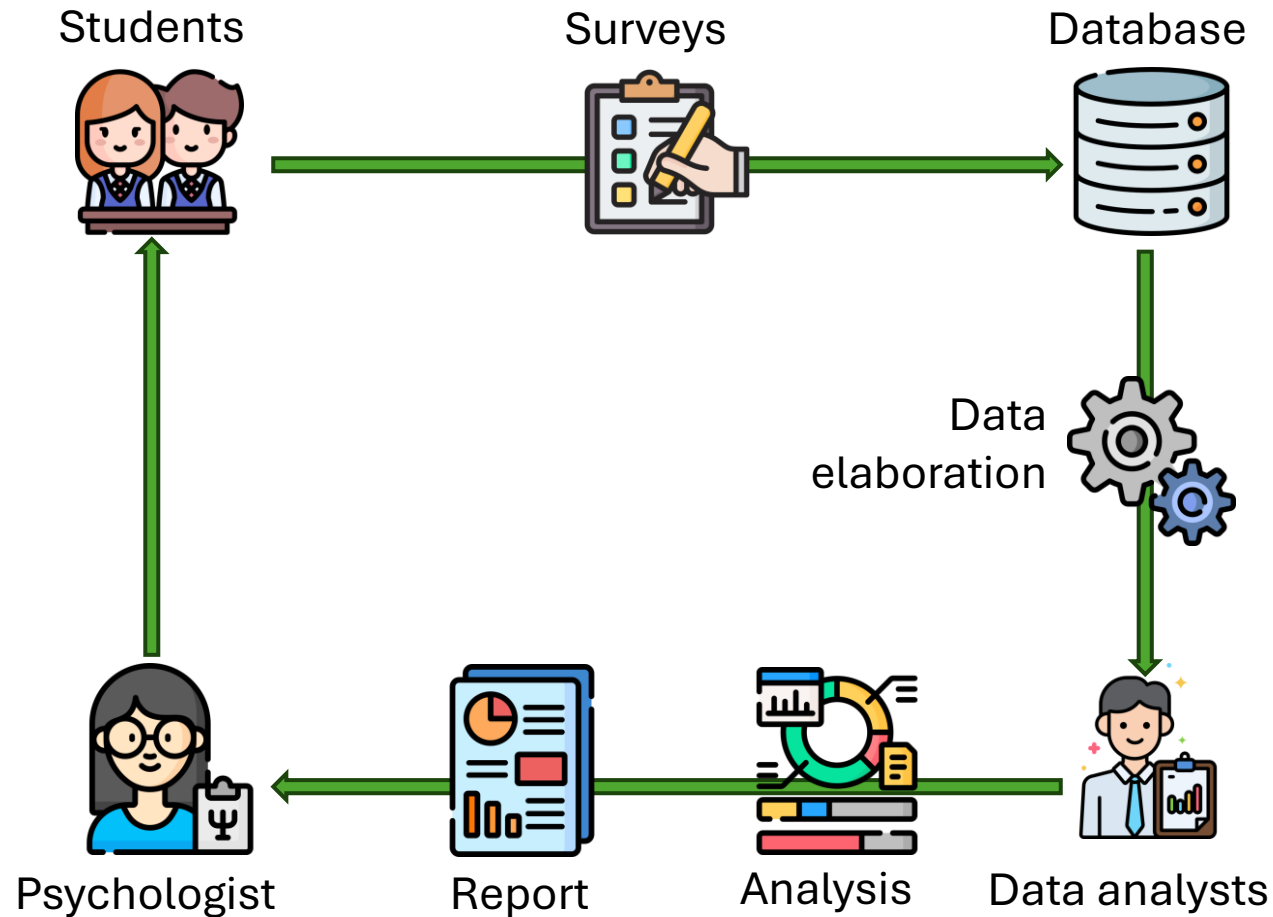

Information System Technology

# Context

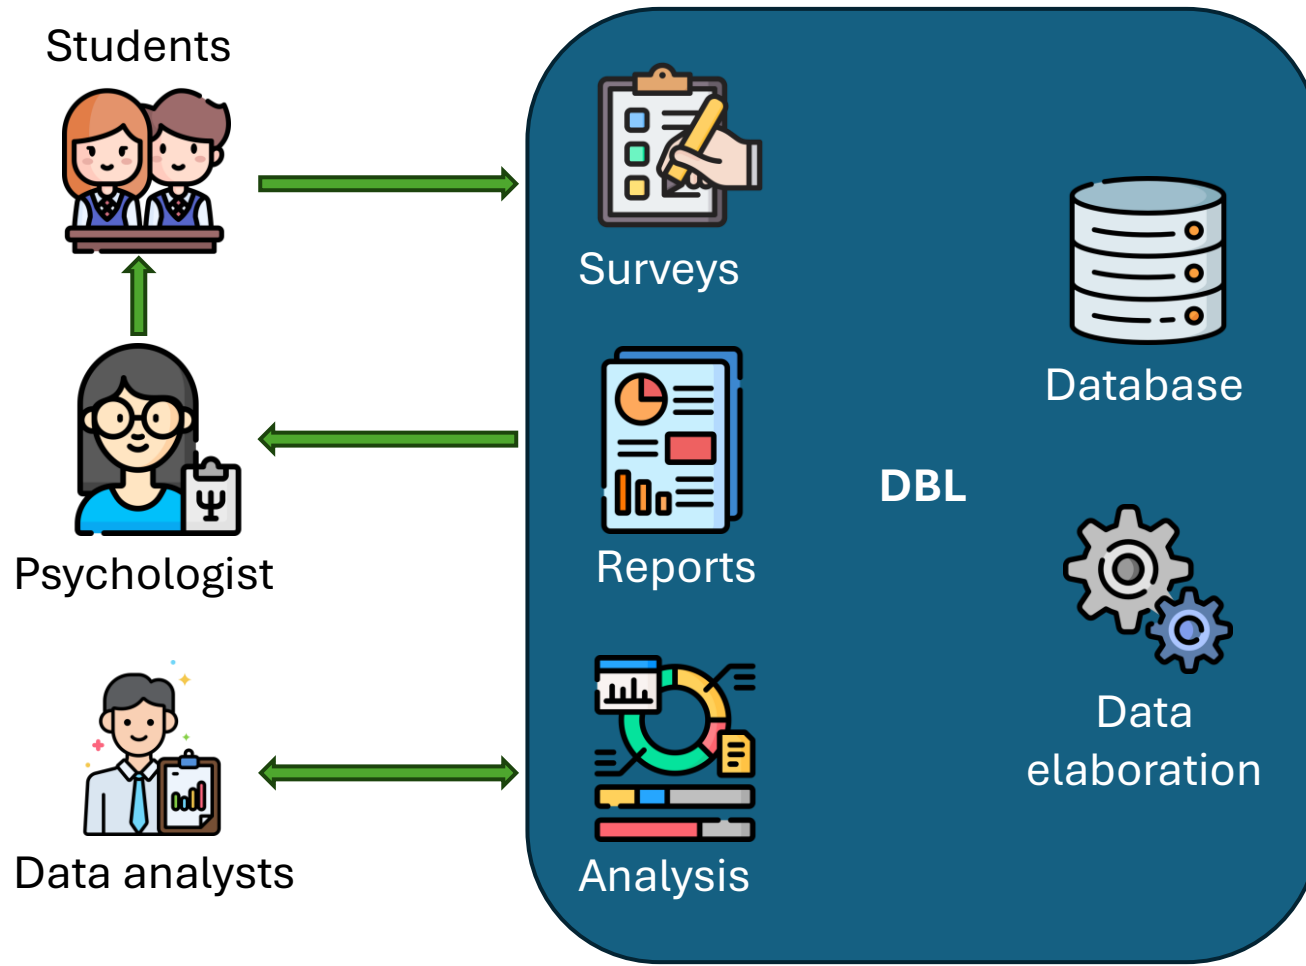

- «Personal Awareness and University Career»
- Questionnaires proposed to the students every semester
- Data are analyzed and returned to the students

# Current Methodology and Problems

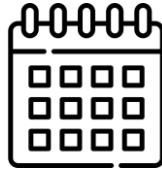

- Slow-moving process (semi-automatic or manual tasks)
- Data compatibility problems (different actors use different tools)
- Low scalability

# Solution

- Faster process (many tasks are automatic)
- No compatibility problems (everyone uses the same platform)
- More privacy for the students
- High scalability

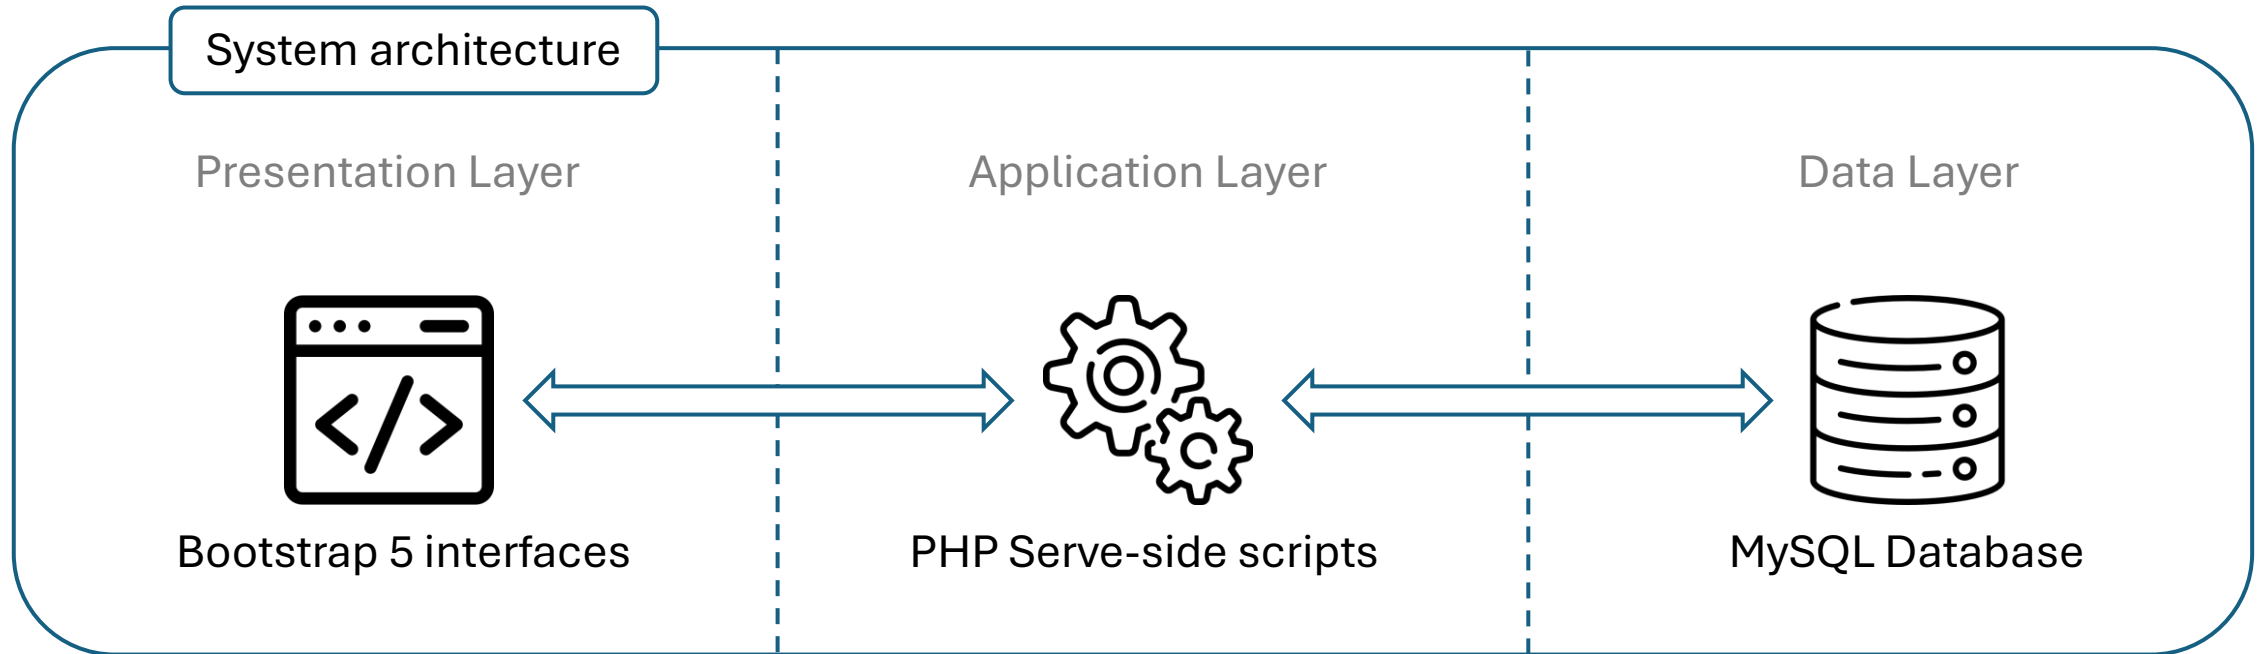

# DBL

1st module deployed  
In September 2024

Hosted on DEIB's  
servers

# DBL

## WELCOME FRANCESCO

This is your DBL dashboard

Below you will find all your active surveys

### Your surveys

#### MINDSET-8

Expires: 26 July 2024    Type: psychological

[Complete survey](#)

#### University Career

Expires: 3 July 2024    Type: university career

Already completed

# DBL

## UNIVERSITY CAREER

Personal awareness and university career: A NECSTCamp study

Current degree program

Bachelor's degree program

Master's degree program

How many semesters have you attended at Politecnico di Milano so far, including the current one?

4

Degree Program

Degree Program...

Architectural Design

Building and Construction Engineering

Urban Planning: Cities, Environment & Landscapes

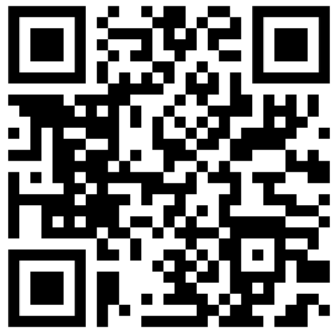

# Future Developments

- Development and deployment of the analysis features
- DBL will be able to:
  - Expand «Personal Awareness and University Career» to a wider audience
  - Host other survey-based studies

# Thank you for your attention
